## POLITICAL CRISIS IN KENTUCKY.

To-Day Decides Democracy's Fate  
in This Campaign.

### CONFERENCE AT LOUISVILLE

Preparing an Address to Be Issued by  
the State Committee to the  
Democratic Voters.

Special to The Post-Dispatch.  
LOUISVILLE, Ky., Aug. 28.—The fate of the Kentucky Democracy, at least so far as the present campaign is concerned, will be decided this afternoon, when the committee appointed by the conference of candidates with the State Central Committee last Saturday, to draft an address to the Democrats, appealing for harmony and unity, meets at 3 o'clock with Executive Chairman Norman for the purpose of formulating the address.

The committee having in its charge is about equally divided on the currency question, as follows: Chas. R. Long, goldbug; Bury Wallace, silverite; H. P. Thompson, goldbug; Hanson Kennedy, conservative; and Geo. W. Richardson, silverite.

The fact that at last Saturday's conference Mr. Kennedy co-operated with the free silverites in the currency question, and against the Long-Castleman contingent, and the further fact that he is on the state ticket as a candidate for governor, has not been a factor in the district which in the last election repudiated Cleveland and Carle by an overwhelming majority, even though Mr. Carle was to represent the larger part in Congress, would seem to indicate beyond a doubt that Mr. Kennedy will be found standing side by side with the silver members of the committee this afternoon. If he does, then it will give them the strength to dominate, and they will unquestionably dictate terms to the gold bugs.

Mr. Richardson, however, is in the revenue service, and there is no telling what sort of influence Secretary Carle, to whom he owes his job, has brought to bear upon him since Saturday. Mr. Long, the most uncompromising and contentious goldbug member of the committee, will, it is believed, interview this morning with the Post-Dispatch correspondent and look for a perfectly harmonious conference this afternoon, if the silverites insist upon endorsing in the address Gen. Hardin's interpretation of the platform will you sign this the committee asked Mr. Long.

"Never," he replied, with emphasis. "Then, doesn't that mean a complete split of the party?"

"By no means," was Mr. Long's answer. "We don't attempt any interpretation of the platform in the address, but simply call attention to the fact in the briefest possible form that the candidates, the State Committee, and the rank and file of the party are divided on the currency question, and appealing to the voters to drop all discussion of the theme from this time forward in the future. It is a matter of success in Kentucky this fall. The party in this State is in graver danger than it ever was before, and only by the restoration of some semblance of harmony can we hope to win."

### JIM CRONIN'S BARTENDER.

Fractured a Woman's Skull With a Revolver.

Joseph Worces and Jessie Kuehne have lived as man and wife at 607 Morgan street for the past five years. Worces is of a jealous disposition. At 7 o'clock Wednesday morning he returned home from Aldermen Jim Cronin's saloon, where he had been drinking, and found his wife sitting at the head of the bed with the butt end of a revolver. Then he cut her in the forehead. During the clubbing process the revolver was discharged. This morning the woman was taken to the Third District. He reached the place in time to save the woman from worse punishment. A physician was summoned, and the woman was found to be dangerously injured. Her head was fractured. The latter resisted and struggled desperately all the way down stairs. In front of the house Himmels told him he would knock him down if he did not submit. Worces then went quietly to the jail, where a warrant for assault to kill was issued.

### ONE MORE UNFORTUNATE.

Crased by Drink and Dissipation Annie Taylor Jumped Into the River.

Crased by drink and the reckless life she has been leading, Annie Taylor, aged 35, living at Third and Carroll streets, attempted suicide by drowning Tuesday evening. She jumped into the river at the foot of Carr street and was fished out in a dying condition.

The Third District patrol wagon was called by Officer Price and the would-be suicide was taken to the City Hospital, where it was found that she had to be transferred to the City Hospital, and now an inquiry into her mental condition is in progress.

Tuesday night the woman became so violent that she had to be shut up in a cell to prevent her from doing herself bodily harm. The ladies of the Third District, who had been visiting her, were alarmed and called the police. When she found she could not get out she prayed for a razor to cut her throat and said she would jump into the river as soon as she was released.

The woman is suffering from alcoholism and the effects of a fast life. The police do not believe she has two children.

### PROPERTY OWNERS OBJECT.

Will Not Allow the Citizens' Road Any More of the Street.

Property-owners on Easton avenue filed a protest in the Board of Public Improvements Tuesday against a permit granted by the board in March allowing the Citizens' Railway six inches additional space on the street for the purpose of widening the cars. They allege that the space is only 36 feet wide, and the railway tracks occupy 16 feet.

Nabbed Her Pocket-Book.

Robert Strand, colored, was arrested by Union Station Constable, who turned over to the authorities Wednesday a complaint from Mrs. J. Hall of 153 Lafayette avenue. Mrs. Hall missed her pocket-book after Strand, who had been sitting next her on the train, disappeared. The pocket-book, which had been containing \$15, was recovered. Mrs. Hall refused to prosecute and Strand was released.

Charles Kelly's Hard Luck.

Charles Frey, who came to St. Louis from Germany with \$2,000 a year ago, and has not a penny now, was arrested Tuesday on the charge of stealing \$15 from Ross Kessler of 329 South Second street. Chief Desmond ordered his release.

## ARE NOT ALL OF ONE MIND.

Medical Men Differ on Dr. Marks' Bicycle Theories.

### ARE AFRAID TO SPEAK OUT.

The Moral Side of the Case Strictly  
Tabooed for Fear of Arousing  
Hostile Criticism.

Dr. Heine Marks' assault on the bicycle, from a moral and physical standpoint, has stirred up a veritable "hornet's nest."

Not only are the bicycle boys and blower girls out for Dr. Heine Marks' scalp because of his pronounced utterances against their "wheel," while other learned doctors coincide with his views and evidently would have liked to set forth their opinions, but for the storm of abuse it might bring down about their ears.

A Post-Dispatch representative made the rounds of the leading doctors and gave them chance to air their views on cycling. A majority seemed inclined to vigorously criticize the ex-Superintendent of the City Hospital for his scathing arraignment of the "wheel," while other learned doctors coincide with his views and evidently would have liked to set forth their opinions, but for the storm of abuse it might bring down about their ears.

Some of the opinions volunteered the Post-Dispatch are the following:

Dr. William G. Kingsbury: "Rot, simply rot, all this talk as to the influence of bicycle riding. I believe it is a good of the bicycle, and advise my friends to try it."

Dr. A. C. Robinson: "My dear boy, it's happy to hear you say so. How you are riding can be harmful. If people will go along quietly and respectfully, sit erect and keep their feet on the pedals, and until they come back, I think it is an excellent form of exercise. I wish I had one myself."

Dr. Tuholske is out of the city, but his assistant, Dr. William S. Deussen, thought cycling like every other form of exercise, even walking and horseback riding, could be abused, and then it was liable to produce bad results, local and general.

Dr. David Nichols: "Dr. Marks' notion of bicycle riding is a Godsend, and instead of destroying posterity will produce a marked effect for the better in the future generation. I am a bicycle rider myself and it hasn't hurt me in the least—I feel better than ever did in my life."

Dr. Tiffin: "I am a dentist and can't give a medical opinion, but hearing and observation, as I am a rider myself, and know that come back from a long ride, I can experience the feeling he speaks of, in my arms, hands and legs. Formerly I took long walks, but now I ride, and I feel better."

"Then I believe that when the mouth has become heated and is opened to fill the lungs, the air is drawn in, and the sums has a tendency to kill the nerves."

Dr. Kimbrough: "Bicycle riding is essentially harmful, but nine riders out of ten carry it to excess, and the results are often fatal. I am a cyclist, and I believe in the healthful effect of the bicycle on the body."

Dr. W. A. Rodds, whose emancipated woman's costume has been an object of derision to the small boys about town for years, was not in the city, but his wife, Mrs. Mary A. Mathews, said: "From the standpoint of the bicycle, I am a rider, and I am dying to get a wheel myself. It is most excellent for the appetite and digestive system, and I believe it is a good thing to have women generally to adopt a more rational form of clothing than that in vogue at present."

Dr. Harvey Mudd evidently had pronounced opinions of his own, but was cautious not to give vent to them. He said: "I have given a great deal of time and thought to this subject and I believe the results of bicycle riding are not so bad as they are made out to be. I am a rider, and I believe in the healthful effect of the bicycle on the body."

## INMAN NOT FOUND.

A Story That the Cotton Merchant Has  
Been Seen Discredited.

### HE FOUND TROUBLE.

Its Thomas Was Spoiling for a Fight  
and Got Fatally Killed.

NEW YORK, Aug. 28.—No trace has been found of Robert W. Inman, the wealthy young cotton merchant, since his yacht was run down in the Narrows Monday evening.

A street car conductor named Joseph Cramer has told of seeing a well-dressed young man at a Staten Island resort Tuesday evening who seemed to have just pulled off of Inman's yacht where he was badly cut. But thus far there is no confirmation of this story, which has in it an element of improbability.

Dr. Tuholske is out of the city, but his assistant, Dr. William S. Deussen, thought cycling like every other form of exercise, even walking and horseback riding, could be abused, and then it was liable to produce bad results, local and general.

Dr. David Nichols: "Dr. Marks' notion of bicycle riding is a Godsend, and instead of destroying posterity will produce a marked effect for the better in the future generation. I am a bicycle rider myself and it hasn't hurt me in the least—I feel better than ever did in my life."

Dr. Tiffin: "I am a dentist and can't give a medical opinion, but hearing and observation, as I am a rider myself, and know that come back from a long ride, I can experience the feeling he speaks of, in my arms, hands and legs. Formerly I took long walks, but now I ride, and I feel better."
